Health expenditure in Canada has been on the increase from 1975 to 2018. The total health expenditure from 1975 to 2018 is \$4,573,260.10.

This increase was mainly driven by four key provinces which are ON, QC, BC and AB in the highest expenditure order.

The highest health care spending by province from 1975 to 2018 was recorded in ON which was \$1,758,749.00, followed by QC which was \$1,013,268.20, then BC which was \$583,957.20 and AB which was \$518,447.30

The trend shows that ON and QC experienced very sharp increases between 1998 and 2018.

Expenditure for AB and BC were closely matched from 1975 until AB overtook from ..

### Healthcare expenditure differs among age groups in Canada by Province

Health care expenditure by province was generally highest for those 65 years and older with ON being \$764.4 for age group 65 - 69

This trend shows that there's a lot of health care spending incurred in ON. Healthcare expenditure in the age group 65 - 69 in ON, which is the highest is more than double the 2nd highest province (QC, which is \$357.6) in that age group.
